Belvita sauna guide

The effects of sauna sessions

Sweating in the sauna trains the body's thermo-regulatory system. The switching between heat and cold stimulates the perfusion of the tissues in the respiratory tract and helps the body to adapt to different temperatures, making the immune response more efficient against cold- and flu viruses.

Steam baths

Steam rooms with high humidity levels have a number of beneficial effects on the respiratory tract and mucous membranes, especially when their antibacterial and energising effects are increased by aromatic essences and oils. Steam baths also have noticeable cosmetic benefits: Particularly if combined with exfoliations and treatments to balance the skin's lipid content, they help rejuvenate the skin's top layers.

Finnish sauna

Finnish sauna sessions are intervals in hot, dry air alternated with cooling breaks. If carried out correctly, this practice is proven to offer considerable health benefits. Exposure to hot and cold stimuli promotes the perfusion of the skin and mucous membranes, and gently trains the cardiovascular system to improve the blood flow and blood pressure regulation. Finnish sauna rituals also increase the body's defenses against infections, cleanse the skin, promote cell regeneration and help relax the mind as well as the muscles.

Use of the spa area

Access to the sauna area is limited to adults.

Saunas may only be used in the nude; clothes and bathing suits are therefore not allowed. T-shirts or similar garments are not permitted even outside the sauna rooms. Bath towels, bathrobes or sauna kilts are allowed.

Slippers must be worn in the entire spa facility, but left at the door before entering the sauna rooms, steam baths and dry saunas.

All guests must shower and towel-dry thoroughly before each sauna session. An appropriately sized bath towel to sit on must be placed on the benches, except for wet- and Belvita sauna guide steam saunas, where towels are not allowed and seats are rinsed with water before and after use.

Swimming- and plunge pools as well as jacuzzis may only be used after a thorough shower.

It is not permitted to modify the sauna settings. All changes in temperature, infusions, operation of ventilation equipment etc. must be carried out by the hotel staff. In the sauna area, the use of mobile phones, cameras and tablets as well as glasses, watches or any other device fitted with a camera is not permitted.

All guests are advised to carefully read the specific conditions of the sauna facilities, such as temperature and humidity, and be aware of their effect on the body. If you have a medical condition, we recommend seeking medical advice before starting a sauna session.

Because our sauna policy requires nudity, appropriate and respectful conduct is essential and must be maintained at all times. Noise and loud conversations must be avoided to guarantee a relaxing experience to all guests.

Tips for a perfect sauna experience

- **Take your time!**

It takes at least two hours to fully enjoy a sauna session.

- **Avoid all physical strain and stress!**

Use of the sauna should be all about quiet and relaxation.

- **Start your sauna session neither hungry nor on a full stomach!**

Allow for a two-hour gap between your visit to the sauna and your last meal.

- **Shower and towel dry thoroughly before**

entering the sauna rooms.

- **Help your body warm up before a sauna session!**

Start with a warm footbath to facilitate the perspiration process.

- **To allow the heat to reach your skin unhindered and**

to prevent skin irritation caused by sweat sticking to your body, do not wear any garments in the sauna.

- **Do not exert yourself!**

Physical activities such as exercise may put a strain on your circulation and respiratory system.

- **We recommend limiting sauna sessions to**

between 10 to 15 minutes, depending on your physical condition. If you no longer feel comfortable, leave the sauna room.

- **After each sauna session, be sure to cool off:**

First help your airways cool down by breathing in some fresh air, then apply cold water or ice, working your way from the limbs towards the heart, i.e. from the arms and legs to the spine and torso and finally the head. To cool off completely, you may wish to take a dip in the plunge pool, but remember to always take a refreshing shower before diving into the cold water.

- **To cool off completely,**

you may wish to take a dip in the plunge pool, but remember to always take a refreshing shower before diving into the cold water.

- **After cooling off, gently warm up your feet**

with a warm footbath and wear woollen socks to maximise the beneficial effects.

- **Take your time!**

It takes at least two hours to fully enjoy a sauna session.

- **Repeat the sauna sessions up to three times at the most.**

Using the sauna can improve your health even in summer, as it strengthens the immune system and cools down the entire body.
